

## Broken Glass

Step 1) Open a new document, fill it with white.

Step 2) Now, take the 'Magnetic Lasso Tool' and make something that looks like this.

Step 3) Press CTRL + T to enter Free Transform mode and rotate the layer to your liking.

Step 4) Create a new layer and use the 'Magnetic Lasso Tool' to make a new shape. Then fill it with black and rotate it around a bit. Do this a few more times to get something that looks like this:

Step 5) Now find a picture that you would like to reflect off the broken glass.

Step 6) Duplicate that layer so there are as many image layers (all with the same image in them) as there are shape piece layers (arrange them so the image layers are above the shape pieces, kind of like this, just for organization, see below)

Step 7) Now click on the image layer above the first shape and CTRL + Left (Mouse Button). Click the shape layer below it and then press the Add Layer Mask button (at the bottom of the Layers Palette).

Do this for each shape you made.

Step 8.) Hide each shape layer.

Give a Drop Shadow Layer style to each image layer.

Image

Step 9) You can add a background if you like.

and you're done!
