

Easy Reflection

Start by downloading the picture [night.jpg](#).

Use the Rectangular Marquee Tool (M).

And select like in the picture below.

Then go to **Select>Inverse** or simply press **Shift+Ctrl+I**.

Now you have the city selected. Go to **Layer>New>Layer via Copy** or simply press **Ctrl+J**.

Go to **Edit>Transform>Flip Vertical**.

Go to **Edit>Transform>Flip vertical**. Using the Move Tool (V) drag the picture down until you obtain an image like this.

Select the opacity to 68.

Go to **Filter>Blur>Motion Blur**. Set the Angle value to -90 and the distance to 10 then click **Ok** and there you have it. You obtained an easy reflection effect.
